Objective

A third-year Computer Engineering student eager to leverage critical thinking and technical expertise in contributing to innovative projects, while actively enhancing skills and knowledge in a dynamic work environment.

Skills

- Programming Languages: C,C++
- Data structures and algorithms
- Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB
- Soft Skills: Problem-Solving Ability , Teamwork , Time Management , Adaptability

Education

Thapar Institute of Engineering and Technology Bachelor of Engineering (B.E.) in Computer Science , CGPA: 8.4/10 (till now)	Patiala,Punjab (2022-2026)
Spring Dale Senior School (CBSE) Class 12 , 93.33%	Amritsar,Punjab (2022)
Spring Dale Senior School (CBSE) Class 10 , 93.4%	Amritsar,Punjab (2020)
Coursework: Operating Systems, Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming	

Projects

Coding Verse	github.com/CodingVerse
• Developed an EdTech platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling instructors to sell courses and students to purchase them online. • Built a user-friendly interface with React.js and implemented backend functionality using Express.js, optimizing CRUD operations and user authentication. • Integrated secure user authorization and authentication using JWT (JSON Web Tokens) for students, instructors, and administrators, along with OTP-based email verification and password reset features to enhance account security. • Developed RESTful APIs to ensure seamless frontend-backend communication and employed Redux for efficient state management, ensuring a responsive and scalable user experience. • Utilized local storage to store tokens and track purchased items for students. • Tools Used: React.js, Node.js, Express.js, MongoDB, JWT, Redux, Cloudinary • Visit here: Link	
Travel Companion	github.com/Travel
• Built a travel companion application that leverages Google Maps API, Travel Advisor API, and Rapid API to provide location-based travel assistance. • Implemented geolocation and real-time fetching of API data based on the user’s current location. • Developed interactive map features, enabling users to explore nearby places, attractions, and services in a seamless manner. • Tools Used: React.js, Google Maps API, Travel Advisor API, Rapid API • Visit here: Link	
Whisp	github.com/Whisp
• Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js) and WebSockets for instant communication. • Implemented user authentication with login and signup functionalities, ensuring secure access to the app. • Integrated WebSockets for bi-directional communication, ensuring real-time message delivery between users. • Tools Used: React.js, Node.js, Express.js, MongoDB, WebSockets, Styled Components	

Experience

Summer Intern at Thapar University	(10th June–19th July 2024)
• Worked on the project "Vision-Based Robotic Arm for Marking and Drilling" for telesurgery, contributing to the development of a robotic arm system aimed at improving precision in surgical operations. • Collaborated closely with professors and a team of five members, gaining insights into electronics and computer vision. • The project was recognized among the top 15 out of 80+ projects in alumini conclave , showcasing its innovative approach and impact in the field. • View Internship Certificate	
Mentor at Institution of Electronics and Telecommunication Engineering (IETE)	
• Served as a web development mentor in the Student’s Forum, conducting workshops on technologies such as HTML, React.js, and other web development tools. • Guided first year students in learning best practices in web development and building their first web applications, fostering growth in technical skills.	

Certifications and Achievements

- **Web Development** – Udemy (2025)
- **CodeKaze** – Coding Ninjas (2023)
- **Front-End Development** – DevTown (2023)
- **100 Days Badge** – LeetCode (2024)
- **Certificate of Appreciation** – Makeathon (Hackathon) conducted by Microsoft Learn Student Chapter (2024)
- **EricssonEdge Academia Program** – Selected among top 500 students for EricssonEdge Academia Program
